**Коментар:** Прогнозираните водни количества на 27, 28 и 29.04.2024 г. ще бъдат около и над средномногогодишните стойности. Днес (26.04) и през следващите три дни речните нива ще се понижават, като в резултат на оттичане днес ще има незначителни повишения на нивото на р. Стрма в долното течение. Водните количества ще бъдат под праговете за внимание.

**Comment:** The forecasted discharges for 27, 28 and 29.04.2024 will be around and above the average annual value. Discharges will be below the attention level.

*В направените прогнози не се отчита работата и ретензионната способност на хидротехническите съоръжения.*
